Indonesian Journal of  
**AGRICULTURAL  
SCIENCE**

Vol. 14 No. 2, October 2013

CONTENTS

- Nitrous oxide emission and nitrogen uptake affected by soil amendment and nematicide in rainfed rice soils at Central Java**  
A. Wihardjaka, S. Djalal Tandjung, B. Hendro Sunarminto and Eko Sugiharto 45-54
- Analysis of genetic parameters for bean physical quality characters and clusterizations of eleven genotypes of robusta coffee (*Coffea canephora*)**  
Rubiyo and Edi Wardiana 55-62
- Effect of feeding corn dried distillers grains with solubles (DDGS) on milk production of cow under hot climate condition**  
Budi Tangendjaja 63-70
- Development and application of 1536-plex single nucleotide polymorphism marker chip for genome wide scanning of Indonesian rice germplasm**  
Dwinita W. Utami, I. Rosdianti, P. Lestari, D. Satyawan, H. Rijzaani and I M. Tasma 71-78
- Direct and indirect somatic embryogenesis on arabica coffee (*Coffea arabica*)**  
Meynarti Sari Dewi Ibrahim, Rr. Sri Hartati, Rubiyo, Agus Purwito and Sudarsono 79-86

Indonesian Journal of Agricultural Science is previously published as Indonesian Journal of Crop Science (1985 - 1999). This journal is published in one volume of two issues per year in April and October by the Indonesian Agency for Agricultural Research and Development. It is available online at: <http://pustaka.litbang.deptan.go.id>.

The journal publishes primary research articles from any source if they make a significant original contribution to the experimental or theoretical understanding of some aspect of agricultural science in Indonesia. The definition of agricultural science is kept as wide as possible to allow the broadest coverage in the journal.
